

Courteous Canine

Health Requirements for Unleashed! Day Camp

Puppies Under 12 Weeks Old

- ✓ Your puppy has lived in your home for at least one week.
- ✓ Proof of one or more vaccinations for distemper and parvo
This is often listed on your receipt as a combo shot "DA2P" or similar.
- ✓ A negative fecal test as performed by your veterinarian (not the breeder/rescue's veterinarian). Please bring a copy of the test result; a receipt confirming that the test was performed is not proof of freedom from parasites.
- ✓ Vaccination for bordetella (kennel cough).

Puppies 12 Weeks + and Adult Dogs

- ✓ Your puppy has lived in your home for at least two weeks.
- ✓ Rescue dogs must have been in your home for one month
- ✓ Two or more vaccinations for distemper and parvo
This is often listed on your receipt as a combo shot "DA2P" or similar.
- ✓ Rabies vaccination as required by law
 - Vaccination for bordetella (kennel cough) is required and should be given at least 5 days prior to your evaluation/trial day.
 - Your pet must be revaccinated for bordetella every 6 months.
- ✓ A negative fecal test as performed by your veterinarian (not the breeder/rescue's veterinarian). Please bring a copy of the test result; a receipt confirming that the test was performed is not proof of freedom from parasites.
 - Fecal test must be repeated every 6 months; copy of test results is required.
- ✓ Due to the rural nature of our camp setting, we also strongly *recommend*
 - Yearly vaccination / booster for Leptospirosis and Lyme.
 - Year-round monthly administration of heartworm preventive.
 - Discussion of pros and cons of canine influenza vaccine with your veterinarian
- ✓ Due to the rural nature of our camp we *require* monthly oral or topical flea and tick preventive.

For families that choose a minimal vaccination protocol for their canines, we require proof of a titer test showing a positive ELISA result of at least $\geq 1:80$ indicating probable protective immunity.

Spay / Neuter:

- ✓ We encourage clients to work with their veterinarians to alter their pets.
- ✓ We require campers who participate in the off-leash socialization components of our program be spayed or neutered by the age of one year
